

DOUBLE YOUR STORAGE IN TIGHT SPACES

BRAND NEW MINI-MEZZANINE

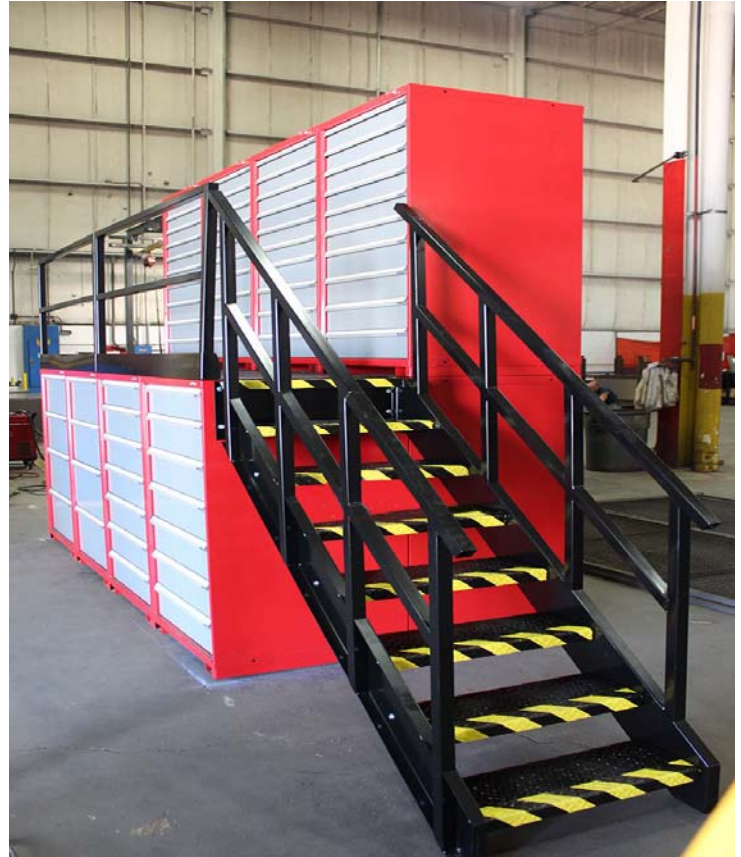

Mini-Mezzanines can more than double your storage capacity, and they're great for tight spaces like parts rooms and on the shop floor.

One of the best features of this solution is you can combine pieces to fit your space.

Designing around a simple platform and stairs, you can add shelving, cabinets, and drawer units in nearly unlimited combinations to hold exactly what you need.

Mezzanines are one of the most flexible storage solutions. Compared to traditional mezzanines, the mini version doesn't need as much vertical height.

Plus, you can move and expand the system in the future and may qualify for Section 179 tax advantages.

Add More Parts Storage

- Keep your Service Department well stocked with their most frequently used parts
- Perfect for recall parts
- Add to your reconditioning area
- Keep accessories close at hand
- Increase technician productivity and service output
- Increase capacity in the parts storeroom
