The **ibml ImageTracDS 1155** resets the expectations for desktop scanning.

Drawing on **ibml's** long history in leadership in document scanning, the ImageTracDS 1155 delivers performance, reliability, and value unmatched by any other mid-high volume desktop scanner.

The combination of the ImageTracDS 1155's functionality and surprisingly affordable pricing uniquely positions the solution for mid-high volume operations with document sorting requirements, operations requiring an affordable but feature-rich back-up scanner, and centralized operations that need a high-speed scanner to capture and consolidate images from remote locations.

#### High Speed Sorting Desktop Scanner

The ImageTracDS 1155 scans up to 155 pages per minute (ppm) at 200 dots per inch (dpi) or 300 dpi. Advanced camera technology ensures the highest-quality images, with 24-bit color image capture and output resolutions ranging from 50 to 600 dpi in JPEG or TIFF file formats.

The ImageTracDS 1155 also comes equipped with two sort trays to eliminate manual handling of separator sheets, checks, or sensitive documents that must be returned to a customer or require post-scan handling. The ImageTracDS 1155 can sort documents up to 150 ppm.

#### Multi-feed detection

The ImageTracDS 1155 comes with five multi-feed detection sensors to eliminate downstream errors. When a double-feed is detected, the ImageTracDS 1155 automatically stops for recovery. Our unique multi-feed technology ensure that all pages are scanned and eliminates the need for operators to do a post-scan review to account for all images.

#### High-Speed Sorting Desktop Scanner

#### Left-justified Feeding

#### Left-justified feeding

The ImageTracDS 1155 also includes best-in-class left-justified document feeding technology that allows for variations in document thickness as well as damaged or sensitive documents. These unique features enable operations to prepare documents for scanning in a matter of seconds using a jogger - eliminating exceptions and increasing staff productivity.
